What our customers are saying:

Highly Recommended
By Douglas V. -
"Steve took the time to talk me through my wireless internet problem and even asked if I had any other questions for him before he hung up. I will take my computer to Steve because I have confidence in his knowledge and he is very sincere. Consider giving Steve your business, I know he will make sure you are completely satisfied with his work. "

Five Stars
by Coty P, -
"Fast and efficient service! He gave me an estimate on the time frame AND called to let me know how things are going with the computer while he had it. PLUS he has reasonable rates. When you're in business it's good to have a repairman you can depend on."
