Daily Computer Maintenance Tips

* Update your anti-virus and anti-spyware definitions, if it isn't done automatically.

* Back up any critical files that you have changed to your flash drive.

Weekly Computer Maintenance Tips

* Make sure your anti-virus and anti-spyware programs have been updated with the latest definitions, and run a full scan from both programs.

* Reboot your computer (If you shutdown your computer each night, disregard this tip). If your computer is always powered on, most problems can be solved by rebooting . It will reset the RAM, and your computer will run quicker and smoother.
